- Material: Stainless Steel wire + Transparent black PVC+ Zinc alloy head
- Universal Computer Lock: Fits Standard, Nano, Or Wedge-Shaped Laptop Security Slots, Such As: Kensington, T-Bar, Noble, Wedge lock.

How to set the combination:

1. Initial combination code is 0-0-0-0
2. Use the tool (included) to press the back side button and turn 90 degree counterclockwise, rollover the wheel to set the new 4-digit codes, use the tool again to put the button back in place, the password is set.

How to lock:

1. Fix the lock cable to an object by passing the lock body through the rope sleeve

2. Turn the code to your own combination, push back the button at the same time and insert the lock to the laptop security slot

3. Turn the dial clockwise until it cannot be turned and scramble the password.

How to unlock:
1. Adjust to the correct password, then turn the dial counterclockwise until it cannot be turned
2. Pull out the lock to complete the unlocking

NOTE: Please write down the new password for future use, there is no master key if the password is lost !
