

P/N: C31.51C2.5

Item Name: USB C MALE - RJ45 FEMALE LAN 2.5G

Introduction:

USB3.1 Type C Male A to 2.5G RJ45 Ethernet Adapter allow the MacBook, iMac Pro and other USB-C devices to connect to wired network. It supports 10 M/100 M/1G/2.5Gbps Ethernet function based on IEEE802.3bz LAN standard. Just plug it into type c port device, you can enjoy super fast transmission speed for file transferring, video conferencing, gaming, and HD video streaming. (Copper networking cable cat6 and above<=20m is recommended to use with this adapter)

Specifications:

- Interface: Type C male
- Material: Aluminum alloy shell+PVC cable
- Chipset: Realtek 8156B
- Standard: IEEE 802.3、IEEE 802.3u、IEEE 802.3ab、IEEE 802.3az、IEEE 802.3bz
- Supports 2.5G Lite (1G data rate) mode, backwards compatible with 10/100/1000 speeds
- Compatible with Win/7/8/10, Vista, Linux, MAC OS 10.8 and above (Free drive for Mac OS and Kernel 5.15 or later, driver required for Windows 7/8/10 systems)

Note:

- The driver program is built in the network card. After inserting the USB network card, double-click the network program in the Explorer to install the driver.
- If test is not 2.5Gbps or system does not recognize it, please install the latest driver from Realtek official website (USB 2.5G, not PCIe 2.5G)
- NOT compatible with Nintendo Switch, TV box, smart phone and smart television
